

K9 Services

PROTECTION | PATROL | DETECTION

Erigere Rapidus Solutions, Inc. (ERS) provides Tier 1 K9 services for superior protection, patrol, and detection services.

PROTECTION

K9s used for executive protective services and patrol can smell, see, and hear dangers long before their human handlers, extending the ability of security teams. These dogs are specially bred and trained to be stable, loyal, social, and well-behaved around those they are assigned to protect, including children and pets. When a threat arises, ERS canines are trained to put their lives on the line to neutralize an attacker while protecting the client.

PATROL/DETECTION

Our detection dogs each complete rigorous training to perform specific tasks and detect distinct odors including explosives, firearms, living victims, human remains, microchips, bed bugs, and more.

K9 TEAMS PROVIDE EXPLOSIVE AND FIREARMS DETECTION FOR:

- Office Buildings
- Retail Establishments
- Restaurants
- Government Facilities
- Stadiums and Arenas
- Ports and Cargo Terminals
- Military Bases/Installations
- Large Gathering Places

Security demands for these venues have increased dramatically in the past decade and deploying K9 teams to screen parking lots, corridors, and concourses is the most effective means to prevent an incident without impeding access or mobility for personnel and attendees. In addition to screening large-scale venues for explosives, our K9 teams are used for active patrol and crowd control before, during, and after events, ensuring a secure environment for your venue.

Depending upon the assignment, ERS K9 teams can be highly visible to act as a deterrent, or covert to perform their missions without detection.

The ERS K9 Division is analytics-driven, and we're using state-of-the-art technology to detect, avoid, and eliminate modern threats.

— Tim Falke
ERS K9 Division Leader

While they are in the field, ERS K9s have cameras mounted to their helmets and a small drone attached to their vests. We simultaneously deploy a command-and-control drone, allowing us to see the entire area from above. Coupling multiple drone and camera platforms provides a better picture of the situation, so we can better prepare to achieve the mission.

CUSTOMIZED DETECTION / GREEN DOGS

Our Detection K9s can be trained to detect microchips, listening/recording devices, subterranean leaks of oil pipelines, and everything from animals to plants, including endangered species. Anything that has a problem, we'll find a solution!

We provide our clients with the highest level of quality and professionalism. Every K9 and handler is hand-picked based on their experience, performance, and professionalism to reliably exceed the expectations of our clients.

For further details, or to discuss how our K9 Division may be the solution you need, contact Tim Falke at tfalke@erigererapidus.com or 1-800-501-1035.
